

360°

MUSCLEMAN

All the benefits of the standard Muscleman are built into this machine, plus the tremendous bonus of 360° versatility.

'Seeing is believing' the incredible angles at which this machine can perform – and all in perfect safety. Comfortable and easy to operate, this is a powerful digger for tough and professional use.

The narrow mode is still a design feature, affording access through a gap of only 0.71m. Digging against a building is possible with a 65° offset as illustrated. Available with a choice of buckets, the 360° Muscleman is also self-trailing.

A 'HOLE NEW 360° REVOLUTION IN DIGGING!
