

The
BAROMIX MAJOR
MICRO EXCAVATOR

YOUR LOCAL STOCKIST:

Blank space for the local stockist name.

Versatile Digging Power
Comes automatically with the BarOmix Major Micro Digger, the ability to dig to depths of up to 2m and to load into trailers 2m high. Simple three lever operation comes as standard equipment, together with adjustable spade stabilizers and wheel track for increased stability and digging power. Excellent operator visibility.

NEW TO THE FIELD of Micro Diggers but backed by over three years detailed research and development. The BarOmix Major is manufactured by a company with over 50 years fabrication experience and a worldwide reputation in the building and construction plant manufacturing industry. A big bonus too, your BarOmix Major comes complete ready to use no expensive extras to purchase to get you digging, towing on the highway or moving round the site. This will enable you to start earning profits straight away.

Confined Spaces
No problem here for the BarOmix Major
Its short overall chassis length and adjustable front stabilizer legs enable you to dig in the most confined areas, or alongside walls without difficulty.

Alongside walls or fencing, presents no difficulty with the two position adjustable front stabilizers, just another part of the BarOmex Major excavators versatility.

On Sight Mobility

Simply raise up the hydraulic rear stabilizer and pull the BarOmex Major along with its jib by means of simple hydraulic movements, very quick, very easy.

On Highway Towing

The BarOmex Major Micro comes fully equipped with road wheels and drawbar for easy well balanced towing behind most cars, vans and pick-up trucks. No expensive secondary trailer required.
(Subject to Road Traffic Act regulations).

After Sales Service

This starts where most others leave off. Our renowned spares and service has an enviable reputation not only in the U.K., but Worldwide, built up with our reputation as one of Britains leading manufacturers of concrete mixers, and operated through our carefully selected distributor network of over 75 dealers in the U.K., and in over 25 countries throughout the world. Made with care with you in mind.

CONTROLS

The BarOmix Major Micro is fitted with simple three lever controls (often an expensive option on many other makes). Considerably simplifying the operators task, one lever controls the jib's rise, fall and slew, and one for the bucket actions, the third control lever operates the rear hydraulic stabilizer.

CONSTRUCTION

It goes without saying that a great deal of attention has been given to this area, the BarOmix Major is possibly one of the strongest Micro Diggers available. Backed by a company with over fifty years experience of making construction plant and equipment and welded steel fabrications for the industry. In short made by people who really know how to put it together.

SPECIFICATION

Maximum digging depth 2m
Maximum loading height 2m
Maximum slew 125°

HYDRAULICS

Top quality geared pump 2.2 gal p/m., 3 lever hydraulic controls with variable relief valve. Five interchangeable hydraulic rams.

WHEELS

Site wheels 500 x 8. Road trailer wheels 145 x 10 with independent suspension units.

ENGINE OPTION

Honda 5HP 4 stroke 9 x 140 or Briggs & Stratton 5HP cast iron heavy duty industrial engine, with electronic ignition and oil alert system.

CHASSIS

Very heavy duty hollow section tubing pressed and welded fabrication. Greaseable moving parts and pivots. Main jib fitted DEVLON bushes.

STANDARD EQUIPMENT

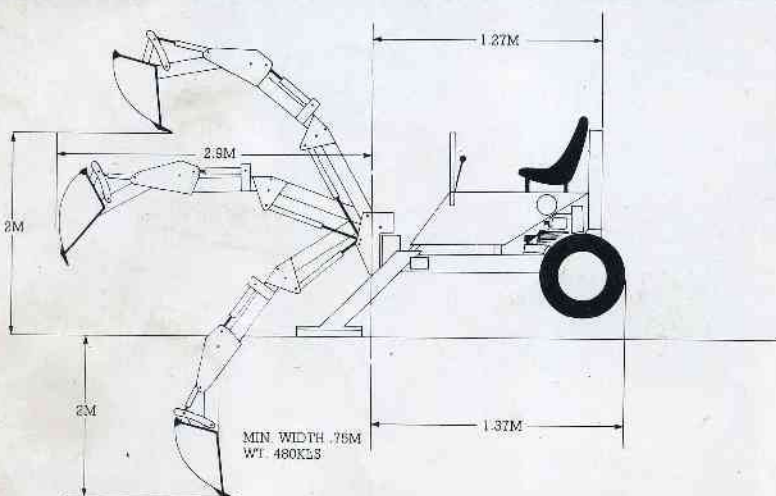

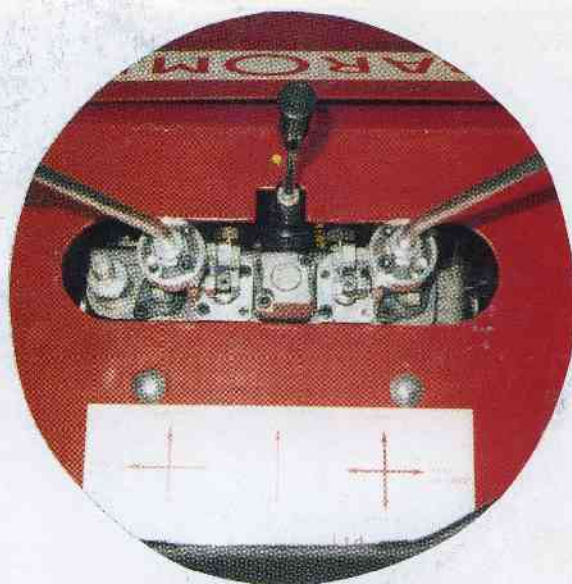

3 lever hydraulic control, site wheels, road towing suspension and road wheels, site close coupled boggy wheels, one 18" standard bucket.

OPTIONAL EQUIPMENT

8" bucket, 24" bucket, rubber pads for front stabilizers.

The excavator is guaranteed for a period of six months. Proprietary parts fitted to our machines are guaranteed separately by their respective manufacturers. This guarantee does not affect the statutory rights of the Customer.

In pursuance of our policy of continual improvement, we reserve the right to amend designs and specifications without prior notice, and for the purpose of the Trade Descriptions Act, all sizes and dimensions must be taken as approximate.
